## ABOUT ME

I am Deepansh Gupta, an enthusiastic and passionate App Developer with experience in Flutter, Kotlin, and Android development. I enjoy building impactful applications that combine clean design with strong functionality. Over the past years, I've developed multiple apps ranging from canteen management systems, expense trackers, and finance tools to corporate parking solutions.

## EDUCATION

**DAYAWATI MODI ACADEMY**  
12<sup>th</sup> Class- 93% • 10<sup>th</sup> Class- 96%

2019-2023

**ABES ENGINEERING COLLEGE, GHAZIABAD**  
B.Tech (Information Technology)

2023-2027

## SKILL

- Mobile App Development (Flutter)
- Backend & Database
- Node.js
- Web & APIs
- Dart, Flutter
- Firebase
- State Management
- MVVM
- App hosting on Google Play

## WORKS

### Canteen Management App (Flutter + Firebase)

A food ordering app for the college canteen with menu browsing, cart management, order tracking, and admin controls.

- Enabled real-time food ordering, cart management, and order tracking for students.
- Provided an admin panel for managing menu items and processing orders.

### Sortify (Flutter + Firebase)

An AI-powered file management app that automatically sorts and categorizes documents for quick retrieval and organization.

- Built an AI-driven file organizer to auto-sort and categorize documents.
- Used Firebase for secure storage and instant file retrieval.

### Findom – Finance Management App (Flutter)

A financial education app that simplifies CA-level concepts like taxation, investments, and savings into easy-to-understand lessons for normal citizens.

- Provides easy-to-understand insights on savings, taxes, and investments.
- Promotes financial awareness with curated learning content.

### Notes Dost (Kotlin)

Developed a productivity-focused Study Mode app that helps users minimize distractions by blocking selected apps, tracking usage, and promoting focused study sessions with customizable timers and progress monitoring.

- Blocks distracting apps during study sessions to help users stay focused.
- Tracks study time and usage patterns with customizable timers and progress monitoring.
